

An ARTpanel is a pre-mounted acoustic panel in an exclusive aluminium profile in white, grey or black.

Acoustic panels are highly effective and literally 'soak up' undesired sound reflections. Our 57mm strong sandwich panels are pre-assembled and delivered ready for use. The panel is printed with a colour or image as desired. ARTpanels are available in different dimensions and are easy to install on the wall.

### ARTpanel applications

Individual frames to be hung on walls or the ceiling, for example as art panels or a projection screen

- Office environments
- Living environments
- Halls and churches
- Waiting rooms

### TECHNICAL SPECIFICATIONS

**Acoustical performance:** NRC 0.95 Alpha W = 1

**Fire-resistance rating:** Frame / content A1, Fabric B-s1-d1

**Weight:** 10 kg per square meter. (m2)

**Mounting:** Thanks to the included metal brackets, they can be easily mounted without any help

### The edge trim

consists of an aluminium profile 57 mm high with a 1.8 mm wide visible edge at the front and a groove at the side of about 1 x 1 cm.

### Colours

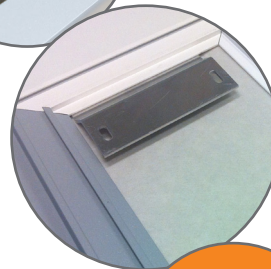

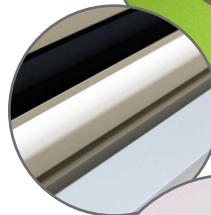

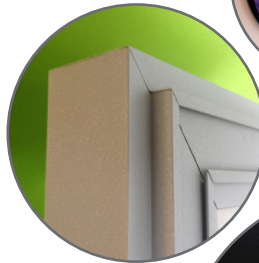

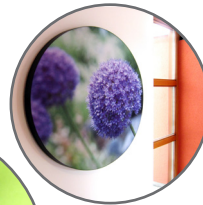

The standard profile colours are: pure white RAL 9016, white RAL 9010, black grey RAL 7021 and grey aluminium RAL 9006.

### CHOICE OF FABRIC OR PRINT

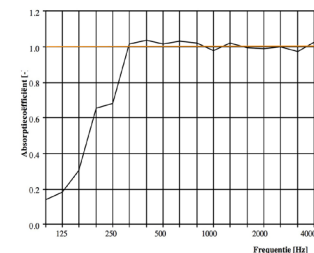

All ARTwall solutions can be finished with various standard solid colours.

### Prints

Very high quality digital prints sublimation printed on Trevira CS give a limitless range of aesthetic possibilities. You can choose prints from our image bank, from a given artist or your own photo, or have a digital file used.
